**NEW PRODUCT RELEASE**

# TILT SLIDE COMBO

**TILT SLIDE COMBO-1.5**  
fitted with a Waeco CFX3 55.  
(TCombo-2 is not shown)

Exclusive to RV Storage Solutions, the NEW Tilt Slide Combo is the fridge slide access system everyone has been looking for.

It is a complete slide and vented fridge barrier in one product! Featuring full aluminium construction this gas strut assisted slide gently and safely tilts your fridge to an angle that makes accessing the contents easy. When completely tilted, the mechanism locks into place.

It cannot descend on its own, making it safe for all ages to use.

Raising the fridge is effortless also. The fridge weight is counter balanced by the gas struts. Simply flick the locking lever and begin lifting the slide. It will float upwards, then slide back.

With interchangeable gas strut dynamics to match your load, life just gets easier.

The built in Cargo Shelf allows cargo to be stored on both sides and on top of the fridge while the vent holes punched side panels allow for plenty of ventilation. No more hassles with gear falling behind your fridge when the slide is extended.

This Combo is compact, light and great value! One purchase does it all and its only 25kgs in total weight!! Great news for helping with your GVM. Best of all, they are made in Australia by the Oliver family so you know they're good.

- All aluminium construction
- 250kg rated slide runners
- Gas strut assisted (250lb)
